This new concept was initially introduced in Bharuch, Surat, Vadodara and Panchmahal districts and thereafter it has been extended to Sabarkantha, Valsad, Banaskantha and Gandhinagar district. Govt. of Gujarat F & E Deptt. GR JFM/1005-191-G Dt.17-12-2005 , the JFM activities are extended even on good forest area i.e above 0.4 density area with a specific condition of net profit showing between Government and JFM @ 80:20 ratio in place of 50 : 50 as it specified for areas below 0.4 density.

With the JFM approach, has resulted in improved in tree cover in many forest areas. This has been further confirmed through the studies carried out by the GEER Foundation on the basis of satellite imaginaries and ground trusting in 10 villages in Sabarkantha Forest Division and two villages in Vyara Forest Division.

To support the JFM villages, the much needed development works are carried out by availing funds from other sources. These activities are popularly known as Entry Point Programme / Activities.

CHAPTER - VI

SOCIAL FORESTRY

Gujarat is a forest poor state. Approximately 10% geographical area of the state is legally designated as forests and it is just not possible to enhance this category of land use. The forests are irregularly distributed and confined mainly to the eastern and southern districts of the state. The situation is aggravated by absence of tree cover from about half of the area. On the other hand, the climate and rainfall of state are quite varied, Agro-climatically the state is divided in to 8 agro-climatic zones. The rains are undependable and droughts are quite common (about 35% of the area is chronically affected) Fodder becomes scare during drought years and the state has to transport large quantites of fodder from far-off places to save the cattle from starvation. Promotion of tree planting on non-forest lands has been considered to be the only answer to improve the situation in the state. The Gujarat Forest Department, therefore, put forth a Social Forestry Programme for planting trees on all types of vacant lands. Under this programme, tree planting is carried out on the following categories of lands : (A) GOVERNMENT LAND :1. Strip lands (along roadside, railway side and canal banks) 2. Government wastelands. 3. Degraded forest lands. 4. vacant lands belonging to other Govt. Depts. (B) SEMI-GOVERMENT LAND: 1. Gaucher lands (Village Panchayat grazing lands) 2. Corporation land and belonging to other Semi-Govt.Institutes (C) PRIVATE LAND : 1. Private land of individuals 2. Degraded farm lands.

During the year 2008-09 the following achievements have been made under the programme of Social Forestry

1. **Avenue Plantation SF- I**

Avenue Plantation are created on the lands along roadside ,railway lines and canal- banks These plantations improve the aesthetic beauty of the area, act as shelterbelts and will also add to the production of fuelwood and timber which is sought daily by the poorer section of the society.

Looking to the climatic conditions prevailing in the State, two treatment models one for Saurashtra/ Kachachh and other similar area of the State and another for rest of the Gujarat are implemented. During the year 400 ha. land was covered under this model.

2. **Avenue Plantation SF-II**

Besides the areas of Saurashtra and Kachchh region, part of Banaskantha, Mehsana, Ahmedabad, Kheda and Bharuch districts are also included under this model. These areas are refractory with shallow and saline soils due to proximity of desert or seacoast. In order to ensure better success, the first row is planted with seedlings of species like Vad, Pipal, Limda etc. and second row is planted with Baval and other locally suitable species. During the year 200 ha. land was covered under this model.

3. **Strip plantation SF-III**

Strip plantations are created on the vacant land of NHW, SHW, MDR, ODR,V.R., and canal Bank and Railway side. During the year 500 ha. of land was covered under this model.

4. **Gram Vatika SF-IV**

Gram Vatika are created on village Gaucher land 625 seeding per hectare are to be planted on block . During the year 900 ha. Of land was covered under this model.

5. Kotar SF-V

Kotar plantations are created on kotar land along major rivers of Gujarat. No. of 635 plants per hectare are to be planted. During the years 360 ha. of land was covered under this model.

6. Barren Hillock SF-VI

Barren Hillock plantations are created on Barren Hillocks 400 No. of plants per hectare are to be planted. During the year 570 ha. of land was covered under this model.

7. Joint Management of Cultivable waste land SF-VII

Joint Management of cultivable waste land plantations are created with the support of local people and concerned Government institutions 400 plants per hectare are to be planted. During the year 370 ha. of land was covered under this model.

8. Plantation in Uncultivable Waste-land SF-VIII

Plantations in Uncultivable WL are created on uncultivable waste lands 200 plants per hectare are to be planted. During the year 320 ha. of land was covered under this model.

9. Environmental Planting SF-IX

Air and Noise pollution near the human habitation has created environmental problems. It is therefore necessary, that all the vacant lands in and around cities belonging to Corporations, Municipalities, Government's Panchayat, School's, college's and other Institutions and also near tourist and religious places are brought under tree cover as far as possible. About 400 seedling per ha. are to be planted under this model at a definite spacing (5mx5m). During the year 340 ha. of area was covered under this model.

10. Rehabilitation of Degraded farm Land -FL SF-X

Land holdings of small and marginal farmers and those of farmers belonging to scheduled tribes and scheduled castes, which are economically unsuitable for raising agriculture crops are covered under this model to supplement their income by starting an activity which can give them quick returns. Under this model, suitable trees including those of fruit are planted in the lands owned by these categories of farmers. Planting is along the field boundary, or lines so as to create assets for the farmers. During the year under review 7933 ha. area was covered under this model.

11. Foreshore plantation SF-IX

Foreshore plantations are created on village ponds 2000 plants per ha. are to be planted. During the year 398 ha. of land was covered under this model.

12. Plantation of Grafted Fruit Trees through Farmers/Landless labourers Participation

For inculcating the interest and active participation of the Farmer/ Landless people living near road side plantations, this scheme is implemented for planting of grafted fruit trees along with forestry tree species. The goal of the scheme is to (1) increase successful (high yielding) plantation, (2) increase income and help to alleviate poverty and (3) increase vegetative cover and to help improve environment in the State. During the year 75 ha. of area through farmers participation and 10 ha. of area through landless labourer's participation were covered under this scheme.

13. Van-Mahotsav

Under this programme , during the year 2009-10 about 2446.58 lakh seedlings & seeds have been distributed to industries , educational institutes, Government/Semi- Government agencies, farmers, religious institutions and individuals through farm forestry.

14. School -Kisan Nursery (D.C.P)

Seedling of various species are raises by the beneficiaries under this scheme. Technical guidance and training is provided to the beneficiaries by staff of Forest department. During the year about 47.45 lakh seedlings were raised and distributed under this scheme.

15. Special component Plan

Five model viz (1) Rehabilitation of degraded farm land (RDFL) (2) MODEL-E (3)MODEL-E Ashramshala (4) Kissan Nursery and (5) Fruit tree plantation (FTP) are implemented under this programme. These schemes include beneficiaries of small & marginal farmers belonging to scheduled caste. During the year the achievements under the schemes are as under

- (1) Under Rehabilitation of degraded farm land (RDFL) 2800 ha. of land was covered
- (2) Under Model-E Environmental plantation 250 ha. of land was covered
- (3) Under Model-E Ashramshala plantation 150 ha. of land was covered
- (4) In Kisan Nursery, 594.96 lakh Seedling were raised and distributed.
- (5) Under Fruit tree plantation (FTP) , 0.98 lakh fruit trees (seedlings) were distributed.
